

Round Opal Diffuser Ø40.2mm (BPERFT40)

Ref. BDRGT40

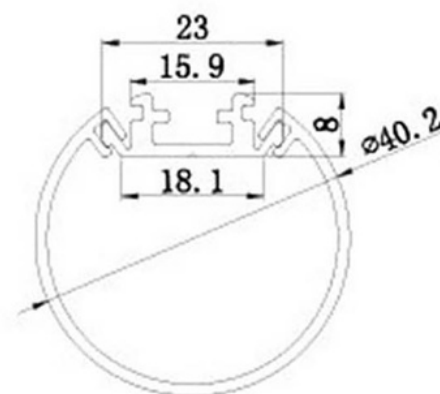

Surface or suspension profile diffuser measuring 23x8mm, with reference BDRGT40. The opal of the diffuser provides better illumination for LED strips, preventing glare and concealing the LED chips inside. The profile has an interior width of 18.1mm. The diffuser will help improve heat dissipation and extend the lifespan of the LED strips, as well as achieve opal white for the 20x27mm surface or hanging profile. The opal color diffuses the light from your LED strips better, avoiding glare and hiding the chips. Additionally, by using profiles with diffusers, we aid in better heat dissipation, extending the lifespan of the strips, while also achieving a more professional and aesthetic installation.
