

Infrared PIR Motion Sensor - 360° - Surface and Recessed

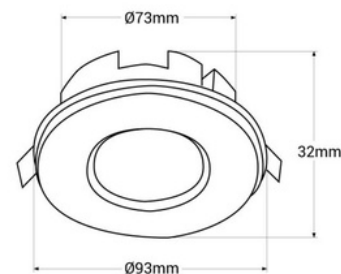

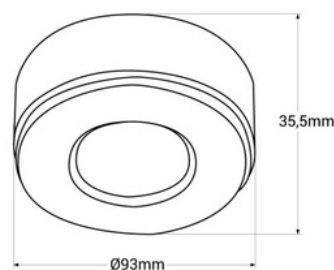

Ref. SP41B

The microwave motion sensor allows you to save energy as it can turn the LED lights on and off automatically. This sensor is a 2-in-1, it can be mounted both on the surface and recessed. The motion sensor detects when someone enters its field, with a detection range of 6 meters and a detection angle of 360 degrees. One of the great features of the sensor is that it detects light both at night and during the day, allowing for more effective use of LED lighting energy. IP20 protection rating, for indoor use only.
