

12-24V Bluetooth Controller single-color + CCT + RGBW + RGCCT 4 in 1 - SUNRICHER

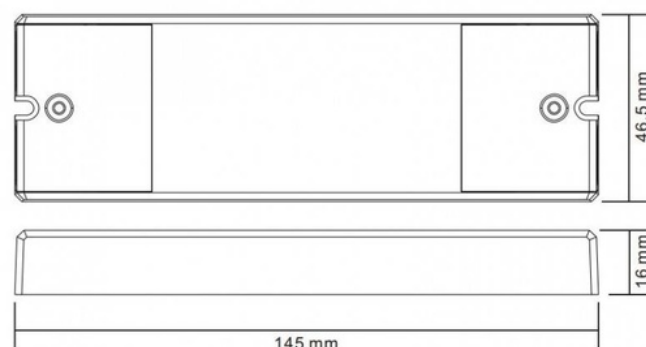

Ref. SR-SB1029-5C

The SR-SB1029-5C is a constant voltage 4-in-1 LED lighting device (DIM CCT RGBW RGB+CCT) with 5 output channels to control single color LED lighting, CCT, RGBW, and RGB+CCT. It allows for controlling the on/off state, light intensity, color temperature, and RGB color of connected LED lights. Recommended for RGBW LED Strips and CCT. Designed with a 12-24V DC input and a constant voltage output of 5 channels, the maximum output current per channel can be up to 4A, meaning a total output of up to 480W. Compatible with RF+Bluetooth remotes, each LED controller can be paired remotely with the remotes or via Bluetooth on your smartphone.

Product data

Certs	CE, ROHS
Dimmable	Yes
Guarantee	5 years
IP	IP20
Output Voltage (V)	12 - 24 V
Nominal Voltage (V)	12-24V DC
Outdoor Use	No
