

Aluminum Profile 58x9mm Half Moon Shaped Surface (2 mt)

Ref. BPERF58X9

Aluminum profile for LED strip, designed for surface installation, in a semi-circular shape. It is a beautiful profile that you can install on the wall or ceiling, either vertically or horizontally. It provides direct lighting towards the area it is pointed at, which is why it is recommended to use an opal or frosted diffuser, as the clear one may cause glare, although it will always depend on how we intend to use it. Easy and quick installation. - Diffuser and plugs not included -

Product data

Certs	CE, ROHS
