

SIDEREUS" moon-shaped plasterboard integrated light - 600x600 mm - 17 W

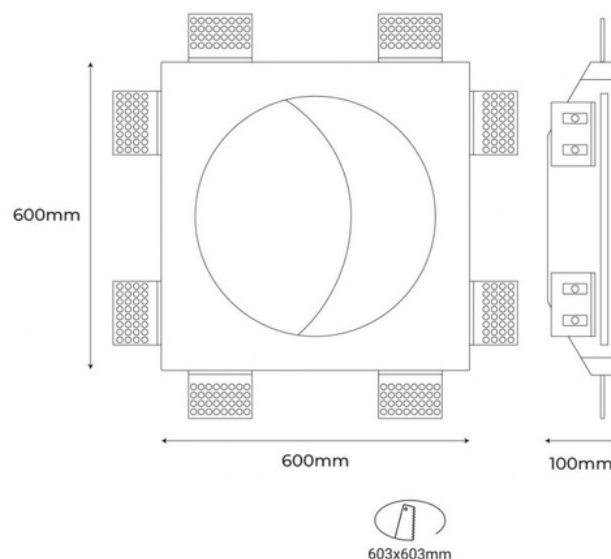

Ref. B279-L

Our lamp "SIDEREUS", with its exclusive moon-shaped design, is made of plaster and is a unique decorative piece. It is an ideal product for achieving original and harmonious environments that will not go unnoticed. It features a built-in light source with a warm tone that gently diffuses from its circular outline, allowing the internal textures that emulate lunar reliefs to stand out. In addition to its uniqueness as a decorative element, this lamp is designed to achieve a perfect integration into the environment, as after a simple installation, it allows for a visual continuity without perceptible edges. The plaster, a material also known as gypsum or plaster, besides being integrable to drywall, can be painted any desired color, thus reinforcing the concept of integration.

Product data
