

Trimmable

Trim to 5mm, 6mm or 8mm for narrower channel

Proximity sensor for On/Off and dimming of LED strips - 5-24V DC

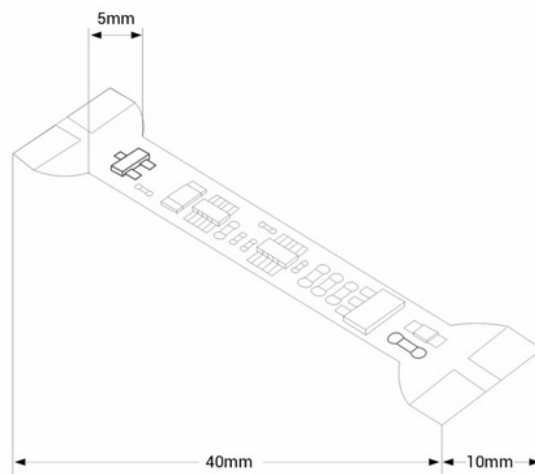

Ref. FDSSM-T10

IR sensor for single-color LED strips from 5 to 24V DC. Controls on/off and intensity by waving the hand at a distance of 8 cm or less. Discreet, it easily hides under the profile diffuser, providing intuitive and aesthetic control over your lighting.
