

Microwave motion sensor with 1-10V control

Ref. S8100-M

Microwave motion sensor. The motion sensor detects up to 8m away; when we enter the area, the fixture receives the command to turn on automatically. When we leave the area or the detectable zone, the lighting switches to energy-saving mode, efficiently saving energy consumption. Install it at a maximum height of 12 meters. 230V - Max. 1200W $\angle$ 150°-360° $\leftrightarrow$ 0-16m 92x52x25mm IP20

Product data

Detection angle (°)	150° on wall, 360° on ceiling
Certs	CE, ROHS
Energy efficiency class	A+ (2021)
Connectivity	Microwave
Dimensions (mm) LxWxH	92x52x25
Frequency (Hz)	50 - 60
Frequency of Use	Intensive
Guarantee	According to legal warranty: 3 years
IP	IP20
Material	Plastic
Assembly	Mixed
Orientable	No
Maximum power (W)	1200
Detection range (m)	0-16
Temperature range	-20°F ~ +40°F
Nominal Voltage (V)	230

Outdoor Use

No
