

RGB IC LED module for illuminated signs - 0.72W - 12V - IP65 - 120°

Ref. BM1431RGBIC

The RGB LED IC modules consist of 3 LED chips and offer ideal decorative lighting for advertising signs and special projects. Each LED chip has its own SMD5050 light source and integrated controller (IC), allowing for individual control of each LED. This way, the modules can be programmed to create complex light patterns and custom animation effects. Its installation is very simple, and due to its high degree of sealing, IP65, this product can be used outdoors. *The price is per module or tablet*
