

Silicijska stezaljka za LED neonsku fleksibilnu traku

Ref. B3250

Silicone holder for high resistance 24V-DC LED Flex Neon. Use this small silicone piece to quickly and easily attach neon lights to the wall or ceiling. It also serves as a complement to metal staples. They are very easy to use, attach one side to the wall with a nail or screw and then adjust the rubber to the neon and secure the other side through one of the available holes for that purpose.
